6 EXPLANATION

7 In 2002, the general assembly enacted S.F. 2293 (2002
8 Iowa Acts, chapter 1137) which in part established a new
9 procedure for approving or disapproving applications for the
10 construction or expansion of confinement feeding operations
11 by the department of natural resources in cooperation with
12 participating county boards of supervisors, based on a master
13 matrix (Code sections 459.304 and 459.305). The purpose of
14 the master matrix is to provide a comprehensive assessment
15 mechanism in order to produce a statistically verifiable basis
16 for determining whether to approve or disapprove an application
17 (Code section 359.305). The Act established a 10-member
18 technical advisory committee to recommend matrix categories,
19 criteria within the categories, and the point values assigned
20 to the criteria. The department adopted a master matrix
21 by rule (567 IAC chapter 65, appendix C). The committee's
22 function was to implement the statute.

23 This bill reestablishes the committee and provides that
24 in conducting its reevaluation, it shall consider methods to
25 better further the purpose of the master matrix as specified
26 in Code section 359.305, subsection 1, without further
27 restriction, including any restriction contained in 2002 Iowa
28 Acts, chapter 1137, § 62 or Code section 459.305 (e.g., no
29 deduction of points).

30 The bill takes effect upon enactment.
